

### Ready-to-install sauna corner modules – a quick and easy solution

---

Treat all the wooden parts of the sauna corner module with a wood preservative to protect the wood from moisture. It's more convenient to treat the corner module prior to installation.

The manufacturer cannot be held responsible for any damage caused by modules not being correctly installed or treated.

### TOOLS FOR INSTALLATION

---

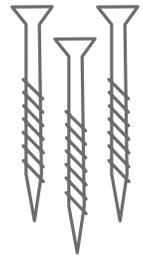

1.

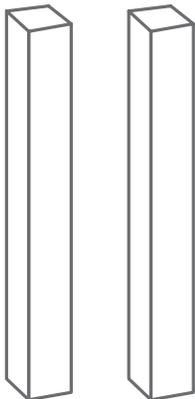

Cordless drill \*

3.

Screws 5 x 80 mm – 4 pcs (according to the dimensions of the backrest). Included in the product packaging.

2.

Wooden supports \*

4.

Wood preservative + paintbrush \*

+

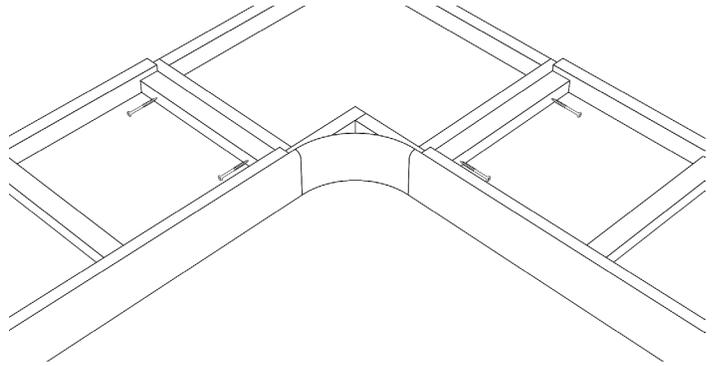

\* Not included in the package

# INSTALLATION PROCESS

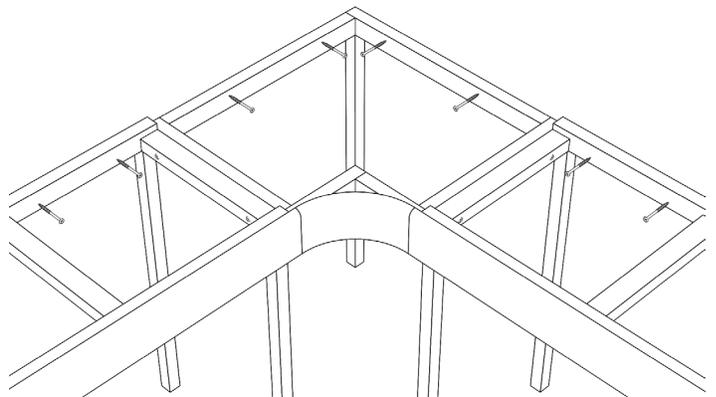

## 1. Connect the corner module frame to the bench frames

On a solid surface, such as the floor, position the corner module's frame adjacent to the frames of the benches that it will connect together. Make sure that the bench frontboards are aligned precisely. Use 5 x 80 mm screws to connect the frames together.

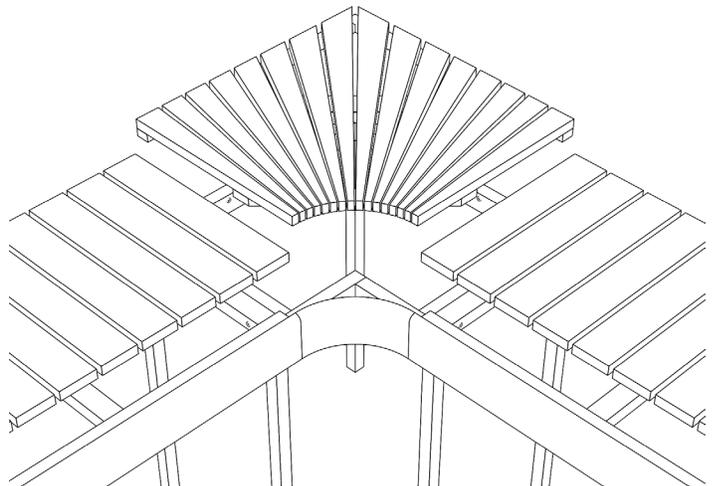

## 2. Install the frames

Lift the assembled bench frames and carefully place them on the bench supports, using 5 x 80 mm screws to fasten them to the walls. Depending on the wall design, longer screws may be required.

## 3. Install supports beneath the corner module

It is recommended to add wooden supports (not included in the sauna corner module package) between the corner module and the floor to support it from every corner.

## 4. Install the bench grates

Lift the bench grates onto the bench frame.
